

## A3 Print File

**Some of the pages in this manual, are designed to be produced at A3 size.**

Such pages are then Z-folded for insertion in the manual.

To assist the user, all of the A3 pages have been assembled here in a single file.

If you have access to an A3 printer, ensure that the printer is set to print at A3 from an A4 file input, and then print the complete file.

If you do not have access to an A3 printer, print the file at A4, and then enlarge the pages to A3 on a photocopier.

***To view/print the affected pages, use the nav pane,  
or click on the icon here***
